

ISO Double Claw Clamps

Introduction

Vacuum hook head is a kind of one-off clamping product which adopting light weight and small clearance design, and there is no damage to the edge of the product. Our high-quality stainless vacuum hook head is characterized by high clamping speed, simple operation, great corrosion resistance and good sealing. With excellent clamping performance, it can 360 degree clamp and seal uniformly, which is better than other similar products.

Advantages

- Simple construction, easy assembling, quick switching, flexible operation, and reliable performance
- Using stainless steel as material, our hook type bolts is sturdy and durable with bright and shiny appearance as well as long service life which can help save costs.
- Strict process technology ensures high quality.
- Exquisite workmanship ensures smooth surface.

Specification

Model	A	B	C	Nominal Diameter
M8	M8	50	13~25	63~150
M10	M10	60	18~28	63~250
M12	M12	78	28~38	320~500

Application

Vacuum hook head is widely used in semiconductor manufacturing, defense research, aerospace, bio-pharmaceutical, LCD, photovoltaic solar energy and other high-tech industries.
